1594 W. North Temple, Suite 3710  
SLC, UT 84114-5610  
538-5535

<b>1. Administering State Agency</b> <u>Division of Oil, Gas and Mining</u>	<b>2. Approximate date project will start:</b> Expanding an existing small mining operation (<5 acres), to a large mining operation.
<b>3. Areawide clearinghouse(s) receiving state action:</b> (to be sent out by agency in block 1) <u>Mountainland Association of Governments</u> Darrell Cook, Executive Director 586 East 800 North Orem, UT 84097-4146	
<b>4. Type of action:</b> / / Lease <input checked="" type="checkbox"/> Permit    / / License    / / Land Acquisition / / Land Sale    / / Land Exchange    / / Other _____	
<b>5. Title of proposed action:</b> Allred Mine, M/049/029, Interstate Brick Company	
<b>6. Description:</b> <b>During Operations:</b> Topsoil and overburden will be removed and stockpiled for later reclamation. As the mine progresses, these materials will be direct hauled to reclaim mined out areas. The clay layer is removed with a trackhoe and stockpiled for hauling to the processing plant later on. As the mine advances into the hill in a southwesterly direction, the area will be benched. A safety berm will be constructed at the top of the highwall to prevent access to the active area. An estimated 11,250 cubic yards of material will be mined annually. No air quality permits are required for this operation.  <b>After Operations:</b> The remaining highwall will be benched and disturbed areas will be regraded. Overburden will be replaced to reduce slopes to a desired 3h to 1v. Topsoil will be replaced at an average depth of seven inches and amended with 10 ton per acre of organic material. Roads no longer needed for access to the property will be reclaimed by ripping to a depth of 18 inches to eliminate compaction. A thin layer of soil or organic material will be spread over the roughed road. All disturbed areas will be broadcast seeded in the fall with an approved seed mix designed to enhance the intended post-mining land use of grazing and wildlife habitat. There are no surface facilities, ponds, shafts, etc. that would require specialized reclamation plans.	
<b>7. Land affected (site location map required) (indicate county)</b> - include UTM coordinates where possible Portions of the South ½ of the Southwest ¼ of Section 9, Township 5 South, Range 1 West, SLBM, Utah County, Utah	

**8. Jordan River Natural Areas Forum review - If the proposed action affects lands within the Jordan River Natural Areas Corridor. (to be sent out by agency in block 1). (see Instructions II below).**

N/A

**9. Has the local government(s) been contacted? Yes If yes,**

**a. How was contact made?** Via the Public Notice

**b. Who was contacted?** Buck Rose, Utah County Community Development

**c. What was the response?** None to date

**d. If no response, how is the local government(s) likely to be impacted?** Increased economy, increased job opportunity

**10. Possible significant impacts likely to occur:**

None

**11. Name and phone of district representative from your agency near project site, if applicable:**

N/A

**12. For further information, contact:**

Lynn Kunzler, Environmental Scientist/Reclamation  
Biologist

**Phone:** (801) 538-5310

**13. Signature and title of authorized officer**

*Susan M. White*  
*Mining Program Coordinator*

**Date:**

*7/12/05*
